## **60 Degrees Pharmaceuticals**

60° Pharmaceuticals (60P) was founded in 2010 with a mission to discover, develop, and distribute new medicines for the treatment and prevention of tropical diseases. Our core business is delivering tropical disease drug research and development while providing an attractive return to investors. 60P has embraced an open innovation approach to reduce the time, cost, and risk needed to build a portfolio of drug discovery and development projects. We collaborate with leading research institutions in the United States, Australia, and Singapore to discover and develop medications for dengue and malaria prevention.
