

G Medical Innovations Company Profile

Overview

G Medical Innovations (ASX:GMV) is a next-gen mHealth and eHealth company developing an integrated product suite that includes consumer medical grade and hospital grade monitoring devices, mobile app and secure cloud platform. G Medical solutions utilise proprietary algorithms that provide and support real-time monitoring of vital signs and biometrics, to better monitor, manage, and improve clinical and personal health outcomes.

The G Medical wireless technologies and proprietary information technology and service platforms (patent pending) are uniquely positioned to empower consumers, reduce inefficiencies in healthcare delivery, improve access, reduce costs, increase quality of care, and make healthcare more personalised and precise. Early detection and diagnosis, as well as accessibility for all patients and providers, will positively impact the direction and cost of healthcare in the future.
