

Global Kinetics Company Profile

Overview

Global Kinetics is a commercial-stage digital health company revolutionizing the management of Parkinson's disease by providing the first continuous and objective measurement of patients' symptoms in everyday environments.

The Company's Personal KinetiGraph (PKG) is a patient-friendly, algorithm-based system that records body movements and other symptoms over the course of many days and creates data-driven reports that empower more personalized treatment and management decisions—with the goal of leading to a higher quality of life for patients. The PKG system is being used in a growing number of clinics across the U.S., Europe and Asia Pacific, enabling better clinical outcomes and reducing health care costs across the Parkinson's disease continuum.

Global Kinetics continues to pursue partnerships with major pharmaceutical and medical technology companies to help measure the efficacy of new and advanced therapies for the world's most widespread movement disorder.

Speaker Profile

John Schellhorn, President and Chief Executive Officer, Global Kinetics Corporation

Based in New Hampshire, USA, John is a 33-year veteran of the Medical Device industry. Ten of those years were spent in senior expatriate assignments. Before becoming President and CEO of GKC, he served as President and CEO of Monteris Medical Corporation. Prior to joining Monteris, John served as the Chief Commercialization Officer for BARRX Medical, and as President and CEO of Softscope Medical Technologies Inc., both of which were successfully acquired by strategic partners during his tenure.

John has held positions as Vice President of Sales and Marketing for the Peripheral Vascular Division of ev3 Inc., Vice President and General Manager International for ACMI Corporation, and various management positions within Boston Scientific. John earned a B.A, Summa Cum Laude, from Long Island University and, prior to his commercial career, he served 7 years as a U.S. Marine Corps pilot.
