Global Kinetics Company Profile

Global Kinetics is a commercial-stage digital health company revolutionizing the management of Parkinson's disease by providing the first continuous and objective measurement of patients' symptoms in everyday environments. The Company's Personal KinetiGraph (PKG) is a patient-friendly, algorithm-based system that records body movements and other symptoms over the course of many days and creates data-driven reports that empower more personalized treatment and management decisions—with the goal of leading to a higher quality of life for patients. The PKG system is being used in a growing number of clinics across the U.S., Europe and Asia Pacific, enabling better clinical outcomes and reducing health care costs across the Parkinson's disease continuum. Global Kinetics continues to pursue partnerships with major pharmaceutical and medical technology companies to help measure the efficacy of new and advanced therapies for the world's most widespread movement disorder.
