

Company profile

Imugene is a clinical stage immuno-oncology company developing a range of new and novel immunotherapies that seek to activate the immune system of cancer patients to treat and eradicate tumors. Our unique platform technology seeks to harness the body's immune system to generate antibodies against tumours, potentially achieving a similar or greater effect than synthetically manufactured monoclonal antibody therapies. Our product pipeline includes multiple immunotherapy B-cell vaccine candidates aimed at treating a variety of cancers in combination with standard of care drugs and emerging immunotherapies. We are supported by a leading team of international cancer experts with extensive experience in developing new cancer therapies with many approved for sale and marketing for global markets. Our vision is to help transform and improve the treatment of cancer and the lives of the millions of patients who need effective treatments. This vision is backed by a growing body of clinical evidence and peer-reviewed research.

Imugene is well funded and resourced, to deliver on its commercial and clinical milestones. Together with leading specialists and medical professionals, we believe Imugene's immuno-oncology therapies will become a foundation treatment for cancer. Our goal is to ensure Imugene and its shareholders are at the forefront of this rapidly growing global market.

Speaker Profile

Leslie Chong, MD and CEO, Imugene

Ms Chong most previously was a Senior Clinical Program Lead at Genentech, a member of the Roche family, in the head office in San Francisco. She has over 17 years of experience in leading clinical and department development in oncology. Most recently, she was the clinical operations program lead for the approved MEK inhibitor in cell-signalling targeted therapy, cobimetinib/Cotellic.

Prior to Genentech, Ms Chong was one of the clinical operation head at Exelixis, in development of 14 compounds and molecules. She has also been a member of the clinical operation department at GSK and PPD.

Leslie believes that early development and research innovation has the ability to bring transformative medicine to patients in need.
