

COMPANY DESCRIPTION:

Livac Pty Ltd (Livac) is an Australian surgical devices company focused on the development and commercialization of novel devices that reduce patient trauma and improve surgical outcomes. The company's first device, the LiVac Retractor is the only commercially available retractor that can retract the liver (required to allow access to the surgical field) using suction from above. The LiVac Retractor is distributed throughout Europe and Australia and is planning to launch in the US early in 2019. The company has a 2nd device in development, the LiVac Sling which the company plans to launch in 2020. In 2017 Livac won the Australian Technologies Company of the year award, and the Australian Technologies Competition for Medtech and Pharma.

PIPELINE AND DEVELOPMENTS:

Livac has two products.

1. The LiVac Retractor is in market with distributors appointed in AU, NZ & EU, with plans to launch in the US in 2019. The LiVac Retractor is suitable for solid organ retraction such as the liver and spleen.
2. The LiVac Sling is in development and a manufacturing partner appointed. The LiVac Sling is suitable for retraction of irregular shaped organs such as the colon, oesophagus and bladder – and will open new markets for Livac.

Both products have achieved global regulatory approvals TGA, CE Mark & 510k required for marketing in all major territories.

WHAT WE ARE LOOKING FOR:

Livac is seeking:

- A strategic partner with US market expertise
- \$5m to support US market entry & continued growth
