

Volpara Health Technologies Company Profile

Overview

Volpara Health Technologies Ltd (ASX:VHT) is a digital health company focused on the early detection of breast cancer by improving the quality of screening, formed by world-leading breast cancer scientists. The cloud based platform, VolparaEnterprise™ incorporates the ability to measure radiation dose, compression and position – helping screening centres to provide more personalised screening options, detect cancer earlier, improve patient comfort and use data to improve quality and productivity.

Speaker Profile

Dr Ralph Highnam, Chief Executive Officer

Dr Ralph Highnam, a founding Director of Volpara Health Technologies, has been at the forefront of the digital breast imaging field for over 25 years.

Initially a research scientist at the University of Oxford, Ralph's innovative work in quantitative breast imaging technology led him to form OXIVA Limited and then Mirada Solutions with Professor Sir John Michael Brady.

Under Ralph's leadership Mirada became the number-one provider of image registration and fusion tools before being acquired by CTI Molecular Imaging Inc. and later Siemens Medical Solutions USA, Inc.
