

SPEAKER PROFILE

Megan Ford
Senior Director
Biotech Delivery Unit
IQVIA

Meg has worked in the Health Industry for 20 years. With a Bachelor of Science she has worked in Hospitals, Pharmaceutical companies and Contract Research Organisations in clinical research. Meg has worked across phase I-IV studies in the areas of haematology, oncology, cardiovascular, neurology, immunology, endocrinology and infectious disease. During her career Meg has worked as a study coordinator, Clinical Research Associate, Project Manager, Line Manager and in Leadership roles.

Meg joined IQVIA in 2012 in the Project Leadership team managing a team of Project Managers. She has also managed teams in Regulatory, Site Start Global Functional Resourcing (GFR), Site Relationship Management and Business Development. Meg current leads the Biotech Delivery Unit for ANZ which is a dedicated team managing phase I and II clinical trials for Biotech customers. This unit provides high quality, agile and cost effective services.

Meg is passionate about Australia continuing to deliver high quality clinical trials and growing research and development.
